Practical observation, training and experiences in the workplace. The college, with the employer, develops and documents and individualized plan for the student. The plan relates the workplace observation, training and experiences, to the student's general and technical course of study. The guided external experiences may be paid or unpaid. The course may be repeated if topics and learning outcomes vary in length. Classroom lectures will prepare the student for written and oral testing, the registration process, and completion of a Case Presentation that meets the guidelines of the Certification Board.
