Midland College
Gainful Employment Disclosure Report
Long Term Care Administration

Program Description

Midland College is approved by the Texas Department of Human Services, Long Term Care Credentialing to offer the five courses and the internship program to those seeking to become Licensed Nursing Home Administrators in the State of Texas.

Five courses are offered via the internet and are available through the Midland College website (www.midland.edu) using the Blackboard program. For details regarding the internship through Midland College call (432) 685-4595.

In order to become a Licensed Long Term Care Administrator in the State of Texas, an individual must possess a bachelor’s degree, complete the five academic courses and the 1,000 clock hour internship, make application to the state and successfully pass the National Association of the Board of Examiners for Nursing Home Administrators (NAB) exam and the Texas State Standards Exam. The following is the suggested sequence of courses for this certificate. Part-time students may require more than four semesters to complete the certificate.

A Career in Long-Term Care Administration

In these careers administrators will plan, direct, or coordinate medicine and health services in hospitals, clinics, managed care organizations, public health agencies, or similar organizations. These individuals are either specialists in charge of a specific clinical department or generalists who manage an entire facility or system. Future medical and health services managers must be prepared to deal with the integration of healthcare delivery systems, technological innovations, and increasingly complex regulatory environment, restructuring of work, and an increased focus on preventive care. They will be called on to improve efficiency in healthcare facilities and the quality of the care provided.

Large facilities usually have several assistant administrators who aid the top administrators and handle daily decisions. In smaller facilities, top administrators handle more of the details of daily operations. For example, many nursing home administrators manage personnel, finances, facility operations, and admissions, while also providing resident care. Medical and health services managers in managed care settings perform functions similar to those of their counterparts in large group practices. They might do more community outreach and preventive care.

Types of Positions

Medical and health services managers, healthcare executives, healthcare administrators, assistant administrators, nursing home administrators, clinical managers with training in health information and medical record administration.

Employment Outlook in Texas

- Texas Employment 2008: 20,570
- Projected Texas Employment 2018: 25,670
- Average Hourly Wage 2009: $40.36
- Average Openings per year due to Replacement: 390
