Course Description: Fundamentals of engine operation, diagnosis and repair including lubrication systems and cooling systems. Emphasis on overhaul of selected engines, identification and inspection, measurements, disassembly, repair and reassembly of the engine. May be taught manufacturer specific. Lab recommended.

Students MUST actively participate by completing an academic assignment required by the instructor by the official census date. Students who do not actively participate in an academically-related activity will be reported as never attended and dropped from the course.

Text, References and Supplies: 1. “Medium/Heavy Duty Diesel Engines” by Gus Wright
Text: 9781284067057

Course Goals/Objectives: Utilizing appropriate safety procedures, the student will demonstrate engine diagnostic procedures. The student will perform cylinder head, valve train, engine block, lubrication and cooling systems diagnosis and repair.

A. CYLINDER HEAD AND VALVE TRAIN DIAGNOSIS AND REPAIR
B. ENGINE BLOCK DIAGNOSIS AND REPAIR
C. LUBRICATION AND COOLING SYSTEMS DIAGNOSIS AND REPAIR

Student Contributions and Class Policies:

1. Student/Participant must furnish a set of approved safety eye glasses.

2. Student/Participant must understand class attendance is critical; therefore, three consecutive absences or five total absences may be considered justification for failure or dismissal from class.

3. Punctuality, being prepared for class, being alert, participating pro-actively and exhibiting a respectful and appropriate attitude will be required.

**Course Schedule:** This class meets for 2 lecture hours and 4 lab hours per week.

**SCANS Information:** SCANS skills are taught and/or reinforced in diesel courses. The student must locate, read, interpret and understand instruction information and direction materials. The participant must communicate thoughts, ideas and information through verbal and written mediums. Practical arithmetic and mathematics will apply continually throughout diesel technology training. Listening, interpreting, and responding to verbal communications and instructions as well as speaking in response to questioning will be a daily involvement. Thinking, reasoning, visualizing and problem solving are required assets to the automotive technician. The student/participant must display responsibility, self-management and honesty.

**Administrative Information:**

Curt Pervier, Applied Technology Dean

Lisa Tanner, Division Secretary
Applied Technology
(432) 685-4676
Fax: (432) 685-6472

Students should feel free to contact the instructor at any time. Appointments are encouraged for advising and planning the most appropriate or beneficial course work.

*Syllabus subject to change as deemed necessary by the instructor to ensure learning objectives and course goals are met.

**Students with Disabilities**
Midland College provides services for students with disabilities through Student Services. In order to receive accommodations, students must place documentation on file with the Counselor/Disability Specialist. Students with disabilities should notify Midland College prior to the beginning of each semester. Student Services will provide each student with a letter outlining any reasonable accommodations. The student must present the letter to the instructor at the beginning of the semester.
