Course Description: Theory of automotive air conditioning and heating systems. Emphasis on the basic refrigeration cycle and diagnosis and repair of system malfunctions. Covers EPA guidelines for refrigerant handling and new refrigerant replacements. May be taught manufacturer specific.

Students MUST actively participate by completing an academic assignment required by the instructor by the official census date. Students who do not actively participate in an academically-related activity will be reported as never attended and dropped from the course.

Course Goals/Objectives: Utilizing appropriate safety procedures, the student will explain the operation of the basic refrigeration cycle; diagnose and repair air distribution systems; demonstrate proper procedures for handling refrigerant and describe the operation of air conditioning and heating controls.

A. A/C SYSTEM DIAGNOSIS AND REPAIR
B. REFRIGERATION SYSTEM COMPONENT DIAGNOSIS REPAIR
   a. Compressor and Clutch
   b. Evaporator, Receiver/Drier, Condenser, Etc.
C. HEATING AND ENGINE COOLING SYSTEMS DIAGNOSIS AND REPAIR
D. OPERATING SYSTEMS AND RELATED CONTROLS DIAGNOSIS AND REPAIR
   a. Electrical
   b. Vacuum/Mechanical
   c. Automatic and Semi-Automatic Temperature Controls
E. REFRIGERANT RECOVERY, RECYCLING AND HANDLING

Student Contributions and Class Policies:
1. Student/Participant must furnish a set of approved safety eye glasses.
2. Student/Participant must understand class attendance is critical; therefore, three consecutive absences or five total absences may be considered justification for failure or dismissal from class.
3. Punctuality, being prepared for class, being alert, participating pro-actively and exhibiting a respectful and appropriate attitude will be required.

Evaluation of Students:

**Course Schedule:** This class meets for 2 lecture hours and 4 lab hours per week.

**SCANS Information:** SCANS skills are taught and/or reinforced in diesel courses. The student must locate, read, interpret and understand instruction information and direction materials. The participant must communicate thoughts, ideas and information through verbal and written mediums. Practical arithmetic and mathematics will apply continually throughout diesel technology training. Listening, interpreting, and responding to verbal communications and instructions as well as speaking in response to questioning will be a daily involvement. Thinking, reasoning, visualizing and problem solving are required assets to the automotive technician. The student/participant must display responsibility, self-management and honesty.

**Administrative Information:**

Curt Pervier, Applied Technology Dean
Lisa Tanner, Division Secretary
Applied Technology
(432) 685-4676
Fax: (432) 685-6472

Students should feel free to contact the instructor at any time. Appointments are encouraged for advising and planning the most appropriate or beneficial course work.

*Syllabus subject to change as deemed necessary by the instructor to ensure learning objectives and course goals are met.

**Students with Disabilities**
Midland College provides services for students with disabilities through Student Services. In order to receive accommodations, students must place documentation on file with the Counselor/Disability Specialist. Students with disabilities should notify Midland College prior to the beginning of each semester. Student Services will provide each student with a letter outlining any reasonable accommodations. The student must present the letter to the instructor at the beginning of the semester.
