SUBJECT: College Level Course Enrollment

Midland College students taking math or English for the first time at the collegiate level must pass the placement exam designated by the appropriate Division Dean. Students wishing to enroll in dual credit classes must pass the appropriate section of the TSI test as well as other appropriate placement exams.

Students should enter classes where they can have a reasonable chance to succeed. Through appropriate testing procedures in reading, English, and math, Midland College counselors will use these testing results to advise students about their readiness to successfully complete courses. In some cases the counselors will advise students to take courses in the areas of deficiencies. Provision is provided for placement waivers.
