SUBJECT: Developmental Education

I. Introduction

Developmental education provides the instruction to ensure college readiness for under-prepared students. Midland College provides a developmental education plan with input from the Developmental Education Committee. It is directly overseen by the Dean for Adult and Developmental Education.

II. Developmental Education Plan

The Midland College Developmental Education Plan provides for the assessment, advising, placement, and developmental education coursework of developmental students. The plan includes completion standards and special requirements for transfer students, casual/enrichment students, and dual credit high school students. Exemptions, waivers, deferment conditions, and modifications to required developmental coursework are also addressed. Procedures may be found in the Midland College Developmental Education Plan, and the Midland College catalog.

The Developmental Education Plan is developed by the Developmental Education Committee, reviewed and approved by the appropriate Dean and Vice President of Instruction.
