Technique - how well is the image exposed, developed and printed?

Creativity - does the print show originality and an aesthetic quality?

ASSIGNMENTS

Calibration- Shoot a roll of film while testing your camera meter and ISO rating. By looking at the negatives we will determine the most accurate record of film density possible, and the best reproduction on a fiber based paper with a wide tonality range. Reference Zone System chapter in your text.

Viewpoint /abstraction- Rather than shoot your camera horizontally from 5 feet at eye level, vary the angles and vantage points that you take your pictures to make them more interesting. Use your camera to find unusual views of whatever subjects you choose to shoot. Incorporate

Theme & Variation- Choose a subject and photograph it in different ways. You may change the location, lighting, camera format, printing or presentation technique. You may also alter the subject each time you shoot it, so you change the way it looks from one photograph to another.

Tableau- Illustrate a story or poem for submission to the Tableau publication.

Homage- Choose a photographer whose work you like, research that person and share biographical information about them, how and what they shoot, where, why... Present four prints in the style of the photographer you picked along with a presentation of their images and verbal report.
