

MIDLAND COLLEGE
SYLLABUS
INTC 1356
Instrumentation Calibration
2-2

Course Description:

Techniques for configuring and calibrating transmitters, controllers, recorders, valves, and valve positioners. Describe the calibration process for various types of instrumentation; and configure and calibrate various system components. The laboratory exercises required are part of this course.

Students **MUST** actively participate by completing an academic assignment required by the instructor by the official census date. Students who do not actively participate in an academically-related activity will be reported as never attended and dropped from the course.

Prerequisite: INMT 1317 Automation or instructor permission.

Text, References and Supplies

Programmable Logic Controllers, Frank Petruzella McGraw-Hill/Irwin, 4e, 2011.
ISBN-13: 978-0-07-351088-2.

Learning Objectives:

1. Identify and explain the function of instruments used in the oil and gas industry
2. Describe common measurement and control systems used in the oil and gas industry.
3. Define and apply terms and symbols used in instrumentation
4. Interpret diagrams of process control elements in a control loop.
5. Describe the calibration process for various types of instrumentation; and configure and calibrate various system components.

Students may perform the following tasks in order to maintain safe lab and classroom spaces:

- Participate in shop and classroom maintenance which may include, but not limited to sweeping, mopping, disposing of trash, cleaning work benches, organize tools and equipment, organize tool room, disinfect classroom tables and chairs.
- Disassemble discontinued lab training vehicles or equipment for salvage.
- Repurpose lab vehicles to be utilized in lab assignments.
- Other course related tasks as assigned by instructor.

Course Policies:

Each student is expected to act in a safe manner. The presence of exposed mechanical and electrical hazards makes unsafe acts inexcusable.

Expectation that student's would never knowingly violate the College's policy on academic honesty. Please assume that all assignments require only individual efforts unless the instructor specifically requests team or group collaboration.

Make-up work is allowed only if pre-approved, or the student circumstances are deemed an emergency, by the instructor. Points for participating in class discussions and group exercises cannot be made-up.

Drop Policy:

It is the student's responsibility to drop this course if circumstances develop that prevents his/her completion of the course. Instructors no longer have the prerogative of awarding the letter grade of "W".

Evaluation of Students:

Participation	35%
Quizzes	25%
Lab	15%
Final Exam	<u>25%</u>
Total	100%
90 and above	A
80-89	B
70-79	C
60-69	D
59 and below	F

Course Schedule: This class meets for 3 lecture hours.

SCANS Information: SCANS skills are taught and/or reinforced in energy/petroleum courses. The student must locate, read, interpret and understand instruction information and direction materials. The participant must communicate thoughts, ideas and information through verbal and written mediums. Practical arithmetic and mathematics will apply continually throughout energy/petroleum training. Listening, interpreting, and responding to verbal communications and instructions as well as speaking in response to questioning will be a daily involvement. Thinking, reasoning, visualizing and problem solving are required assets to the energy/petroleum field. The student/participant must display responsibility, self-management and honesty.

Administrative Information:

Curt Pervier, Dean of Applied Technology

Lisa Hays, Division Secretary
Office: Rm 143 TC
Phone: (432) 685-4676
Fax: (432) 685-6472

Students should feel free to contact the instructor at any time. Appointments are encouraged for advising and planning the most appropriate or beneficial course work.
